

# ENTREPRENEURSHIP

ASSOCIATE OF APPLIED SCIENCE  
61/62 CREDITS

Entrepreneurship is tailored for individuals with technical training or a keen technical interest, who are willing to embrace the gratifying, yet demanding world of entrepreneurship. Students learn communication, math, science, and business management basics, increasing their marketability or ability to start a business. Graduates are prepared to enter their field with enhanced skills and confidence.

Our Entrepreneurship degree allows experienced students to use their technical training through credit for life experience, military transcripts, or diplomas from career and technology centers. For beginners, the degree offers a solid foundation in technology and computer applications.
